

Take the Next Step

If you have chronic knee pain or have been diagnosed with knee osteoarthritis (OA), you may qualify for a new clinical research study. The study is exploring the effect of an investigational injectable medication for chronic knee pain associated with OA.

SELECTED ELIGIBILITY CRITERIA

- ✓ Age 40 or older
- ✓ Chronic knee pain for at least 6 months
- ✓ Do not have any non-OA inflammatory joint conditions, such as rheumatoid arthritis or gout
- ✓ Have not previously had a partial or total knee replacement on the knee that is currently causing you pain
- ✓ Able to attend multiple, periodic visits to your study doctor's office over an approximate 6 to 7-month period

Chronic knee pain?

INFORMATION ABOUT A
NEW RESEARCH STUDY

Do you have chronic pain or aching in your knee?

If you suffer from chronic pain or aching in your knee, you may have osteoarthritis (OA) – a common and painful joint condition that can interfere with everyday life. Knee osteoarthritis usually develops gradually over a period of years due to everyday ‘wear and tear’, but for some it can develop quite rapidly. Each year, over 700,000 people undergo total knee joint replacement to relieve their pain. However, surgery isn’t for everyone.

Osteoarthritis is the most common form of arthritis, affecting 32.5 million US adults

You may qualify for a new clinical research study.

Right now, doctors at select locations throughout the US are accepting participants for a new clinical research study. The study is exploring the effect of an investigational injectable medication for chronic knee pain. If you are 40 years or older and have struggled with chronic knee pain for at least 6 months, you may be eligible to participate.

If you qualify and join the study, you will be seen by a local physician and will receive study-related care at no cost. As part of the study, you will be asked to meet with your local study team multiple times over an approximate 6 - 7-month period. These visits are an important part of the study, as they allow your study doctor to closely monitor your knee condition and overall experiences. Patients may be compensated up to \$1,300 for their ability to complete multiple study visits.
